## Rural Broadband Initiative (RBI)

Connecting 86% of rural homes and businesses (outside UFB areas) with broadband at peak speeds of at least 5Mbps by end 2015, through fixed wireless and improved copper services.

### Vodafone

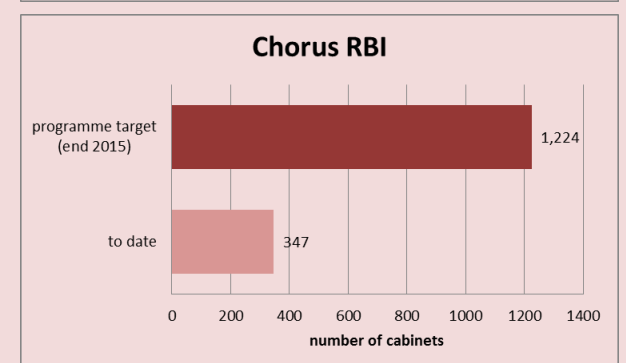

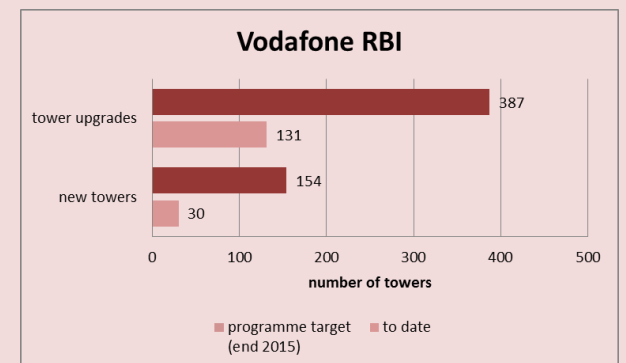

Role: provision of fixed wireless broadband capable of peak speeds of at least 5Mbps.

	this quarter	to date
Towers upgraded:	51	131
New towers installed:	13	30
Number of households covered (approximate):	33,755	89,235

### Chorus

Role: deployment of fibre to cabinets, offering improved broadband services. Some residences will receive copper-based broadband speeds of up to 20Mbps.

	this quarter	to date
Cabinets upgraded:	83	347
Number of households covered (approximate):	12,700	36,100

## Priority Users

To be connected with fibre capable of peak speeds of at least 100Mbps through the UFB or RBI. Remote schools will receive point-to-point wireless connections capable of peak speeds of at least 10Mbps.

### Schools

	this quarter	to date
UFB: number of schools with fibre past the school gate	152	690
UFB: number of schools with fibre connections (ready for service)	130	626
RBI: number of schools with fibre past the school gate	90	634
RBI: number of schools with fibre connection (ready for service)	95	626
Number of remote schools connected:	9	23

Note: The programme target covers state and state-integrated schools. It includes schools that have been connected to fibre outside of the UFB and RBI.

### Hospitals

	this quarter	to date
Number of hospitals with fibre connections	4	9

Note: number of hospitals does not include hospitals connected to fibre prior to the establishment of the UFB and RBI.

This quarter Thames Birthing Unit, Thames Hospital, Elizabeth R Hospital Complex (Stratford, Taranaki), and Helensville Health Trust received a fibre connection.
